

## Special Issue

# The Progressive Replacement of Traditional Agriculture by Precision Livestock Farming and Super-Intensive Crops: Effects on Land Degradation and New Challenges

### Message from the Guest Editors

In this Special Issue, we are particularly interested in better knowing and understanding how this progressive replacement of traditional systems with new ones is affecting land degradation processes, including:

- Soil erosion;
- Loss of biodiversity;
- Depletion of water resources;
- Soil and water pollution;
- Soil salinization;
- Soil compaction;
- and other agro-environmental processes.

Research papers focusing on geographical areas that are now experiencing significant changes in land use/management in terms of the substitution of traditional practices are welcome. Models or in situ experiments as well as reviews or technical reports are strongly encouraged.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
