

Special Issue

Evaluation of Sustainable Ecological Landscape Quality

Message from the Guest Editor

This Special Issue focuses on both in situ methods of landscape quality analysis and methods based on the application of so-called landscape-based surrogates. The first approach explores issues such as the impact of the water and soil quality, biodiversity, and ecological processes on the functioning of the nature at the landscape scale. The second approach deals with the application of measurement indirectly testifying on the LEQ and includes the application of geomorphometric indicators, measurements based on the spectral variability and landscape metrics.

Guest Editor

Dr. Barbara Sowinska-Świerkosz

Department of Hydrobiology and Ecosystems Protections, University of Life Sciences in Lublin, 20-262 Lublin, Poland

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
