Special Issue

Emissions from Road Transportation and Vehicle Management

Message from the Guest Editor

Emissions from road transport continue to play a critical role in impacting the environment and, in particular, air quality and climate. Many countries and regions around the world are adapting regulations for light-duty vehicle (LDV) and heavy-duty vehicle (HDV) testing and setting ambitious emission limits for pollutants and climate strategies and targets. On the other hand, internal combustion engines are equipped with a variety of advanced emission control technologies to cope with strict emission limits imposed not only in certification tests, but also on the road. Therefore, the next decade can be seen as the most crucial in determining the future of sustainable mobility. The goal of this Special Issue is to capture the current state-of-the-art in road transport, pollutant, and CO2 emissions from different road transport segments, their compliance with target limits in different driving tests and real-driving conditions, policy expectations, and industry responses. This Special Issue aims to collect contributions in any of these areas, with the aim of providing new insights into the future challenges of road-transport-related emissions and vehicle management.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
