Education for Sustainable Development: Transversal Skills in Sustainability in Higher Education

Message from the Guest Editors

One of the targets for the Sustainable Development Goals announced by the United Nations in 2015 aims to ensure that all learners acquire the knowledge and skills needed to promote sustainable development. In this context, with universities being a subsystem of society and oriented by its needs, values, and norms, a slow and laborious process of change is foreseen.

Education for sustainable development, ESD, prepares learners to understand and respond to the changing world and drives sustainable development. It produces learning outcomes that include core competences, which can be summarized as twelve competences: systems thinking; interdisciplinary work; anticipatory thinking; justice, responsibility, and ethics; critical thinking and analysis; interpersonal relations and collaboration; empathy and change of perspective; communication and use of media; strategic action; personal involvement; assessment and evaluation; and tolerance for ambiguity and uncertainty. Therefore, the purpose of the Special Issue is that university professors who are working in this regard present their contributions, focusing especially on technical studies, engineering, and architecture.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
