

Special Issue

Environmental, Social, and Governance (ESG) Issues during Crises and Beyond

Message from the Guest Editors

This Special Issue aims to better understand how sustainability issues, also referred to as environmental, social, and governance (ESG) issues, are (or not) affected during crises and beyond. It also aims to understand the impact of these sustainability issues on corporations and their industries during crises and beyond. We are interested in understanding the impacts and implications at different levels. This Special Issue aims to invite submissions of high-quality articles on topics related to the above issues to gain a better understanding of how sustainability issues are (or being) affected during and after different types of crises or distressed situations. This could provide useful insights on the way forward to more efficiently deal with future crises.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada
