Special Issue

External Thermal Insulation Composite Systems (ETICS): Sustainable Technology for the Growth of a Resource-Efficient and Competitive Economy

Message from the Guest Editor

We are all facing adverse effects related to progressive environmental degradation. Each day, we observe an unprecedented growth of interest in renewable resources and sustainable energy. Nevertheless, we still have to learn how to use them efficiently and responsibly. Without sustainable construction, there is no sustainable development. The use of an external thermal insulation composite system (ETICS) is a solution for the thermal insulation of the outer walls of both new and existing buildings. The diversity of its application depends on the legal, urban, and climatic conditions. The primary focus of this Specials Issue is to present state-of-the-art ETICS design and highlight the most challenging aspects related to its impact on the energetic efficiency, environment, society, and comfort of living. Special attention will be paid to those contributions that consider the disadvantages and advantages of methods used to compare ETICS environmental impacts and assess its long-term durability and performance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
