

## Special Issue

# Advanced Studies in Economic Growth, Environment and Sustainability—2nd Edition

### Message from the Guest Editors

The aim of this Special Issue is to present an updated set of studies, theoretical ideas, and methodological developments that deal with the economic growth–environment–sustainability nexus. Loosely, we look for papers addressing issues related to the climate and environmental risk management regarding water, land, and soil. This Special Issue will include, but is not limited to, the following topics: i) how economic growth contributes to sustainable development; ii) how sustainability contributes to mitigating climate change; iii) the introduction of good practices in sustainable development that enhance environment; iv) the implications of different contexts, namely the good use of water, energy, and fossil fuel combustion; v) the implications of adopting corporate governance, market structure, and geographical, cultural, and gender aspects, etc.; and vi) exploring the moderating effects in the relationship between economic growth and sustainable development. **Keywords:**

- economic growth
- environmental degradation
- climate change
- sustainable development
- water management
- governance

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
