

Special Issue

E-business - The Perspective of Systems Thinking and Sustainability

Message from the Guest Editor

E-business can be described as a way of creating value in an enterprise in which the use of the Internet or information and communications technology (ICT) plays a key role. This concept applies to both new industries and the digital transformation of traditional ones. During the last 20 years e-business has transformed consumer activities, corporate models and strategies, and even market behaviour. In this Special Issue, we want to encourage to research the phenomena of e-business through the lens of the systems thinking and the concept of sustainability. Given the wide range of topics and possible approaches, we are open to articles that use various research methods, including theoretical and position papers, qualitative and quantitative studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:
