## E-learning and Sustainability in Higher Education

### Message from the Collection Editors

In recent years, electronic learning (e-learning) has been widely applied to various fields and has become a popular issue in higher education. Today, e-learning represents an important education technology that can help the teacher to realize the learning status in a timely manner to enhance adaptive learning. Thus, we believe that the concepts from web-based learning may still benefit from the development of e-learning for sustainable development and education.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

- E-learning in higher education
- Mobile learning in higher education
- Education technology in higher education
- Sustainable development in higher education
- AI in higher education
- AR/VR in higher education
- MOOCs
- SPOCs
- Adaptive learning
- Web-based learning
- STEM/STEAM
- Maker education

We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
