

Special Issue

Earthquake Engineering Technology and Its Application

Message from the Guest Editors

This Special Issue focuses on current developments in earthquake engineering, including ground motion characteristics, soil and foundation dynamics, wave propagation, behavior of structures, and methods for earthquake resilience and the retrofit of structures that are germane to practicing engineers. In this Special Issue, we welcome works that improve the understanding of earthquake engineering from theory to application. **We welcome works related but not limited to the following topics:**

- Ground motion characteristics and simulation methods.
- Artificial intelligence for earthquake engineering analysis.
- Experimental investigation of the seismic response of major infrastructures.
- Inverse problems, identification and structural health monitoring in earthquake engineering.
- Dynamic constitutive behavior of materials (soil, concrete, etc.).
- Seismic analysis of steel and reinforced concrete structures, nuclear power structures, dams, etc.
- Performance-based seismic design of structures and earthquake-resilient cities.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
