Sustainable Ecological Infrastructures and Human Well-Being: Regional Landscape and Socioeconomic Contributions

Message from the Guest Editors

We are living in a world deeply entwined with ecological infrastructures (EIs). Our lives interact with a network established by green and blue spaces (GBSs), where we access well-being by enjoying natural products and stress relief without worries about danger or threat. Air, sunlight, soil, water, plants, and biodiversity in EI all become meaningful if we are aware that the contact with, or the thought of, them will confer us wellness and satisfaction. This is the route we need to take in order to achieve Sustainable Development Goal (SDG) III, that is, to “ensure healthy lives and promote well-being for all at all ages”.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
