

Special Issue

Towards the Ecological Transition: Urban Regeneration Models in the Circular Economy Perspective

Message from the Guest Editors

In order to ensure that new models of urban development are really useful to cities, the principles and theoretical criteria have to be supported by tools (assessment tools and business, governance and financing models), which, in turn, necessarily require a strong cultural base, the latter being necessary in order to develop and support shared and sustained initiatives from the bottom, in line with the humanization paradigm. In this context, the discipline of evaluation becomes fundamental, and helps not only to compare design alternatives already provided, but also to continuously produce, through a circular feedback and retroactive loops, new solutions aiming at a positive-sum game, in which all subjects gain benefits.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
