# **Special Issue**

# Impacts of Climate Change on Hydrology, Water Quality and Ecology

# Message from the Guest Editors

Global warming or climate change has become an inevitable reality because we have suffered from tremendous serious disasters resulted from inoccasionally-extreme meteorological events. Despite global efforts on the mitigation and adaptation of climate change impacts, all social, economic, environmental and ecological damages have been increasing. Before the implementation of any adaptive measures, it is definitely required to analyze the quantitative impacts of climate change on hydrology, water quality and ecology in both global and regional scales, as well as to precisely forecast the future climate conditions. This Special Issue will show the state-of-theart techniques and various global applications for the impacts of climate change on flood, drought, groundwater vulnerability, water quality and ecology in a global and regional scales based on historical climate data and various climate change scenarios. Although, there have been plenty of articles on this theme for the past several decades, it should be continuously studied due to its importance. Furthermore, comprehensive review on this issue can be very helpful to all interested researchers in the world.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
