# **Special Issue**

# Economic Analysis of Environmental Goods for Policy

### Message from the Guest Editors

Economic activity can pose serious threats to the current and future conservation of environmental goods and the associated ecosystem services by polluting natural systems, overexploiting natural resources, transforming land from biodiversity habitats to cropping or housing, and contributing to global change. Public intervention may lead the role to internalize environmental externalities by both regulation and promoting incentives. Economic analysis is particularly relevant to guide policy decision-making to conserve and improve the environment. This Special Issue aims to contribute to such a field, assessing environmental policies through economic analysis and it might include, but is not limited to, the following topics:

- Economic valuation of environmental goods;
- Analysis of institutional mechanisms for conserving environmental goods, including payments for ecosystem services and tradable entitlement systems, among others;
- Protected natural areas and species conservation, including aspects such as ecotourism, endangered and invasive species;
- Integration of economic and ecological modelling, supporting the assessment and design of environmental policies.

## **About the Journal**

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
