

Special Issue

Economic Sustainability: Strategy, Efficiency, Profitability, and Prediction of the Insolvency of Organizations

Message from the Guest Editors

To help explore quality research on economic sustainability, we present this Special Issue. Our goal is to encourage scientists to publish their experimental and theoretical research related to sustainable economics in organizations. Strategic management plays a fundamental role in ordering all actions and guiding organizations. Profitability and efficiency must be monitored in organizations, in balance with the legitimate interests of the stakeholders. It will be helpful to study the survival of organizations in order to predict insolvency and develop early-warning mechanisms to guide us in the right direction. The objective of this Special Issue is to communicate the latest research findings impacting upon the economic sustainability of organizations. The purpose of this Special Issue is to bring together state-of-the-art research on economic sustainability and to analyze its future directions for researchers and practitioners.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
