# Economic Uncertainty, Infrastructure Development and Sustainable Tourism

### Message from the Guest Editor

The tourism sector has grown significantly in the last couple of decades, and has become one of the major drivers of economic development, the accumulation of foreign exchange reserves, and the creation of employment for both skilled and unskilled labour. On the other hand, the tourism sector is also becoming more vulnerable to the increasing economic uncertainty domestically and globally. Given these facts, it is important to empirically investigate the roles of economic uncertainty and infrastructure development in the tourism sector.
