

Special Issue

Economics and Governance of Sustainable Urban Water Management

Message from the Guest Editors

This special issue is dedicated to sustainable water management in urban areas, with a particular focus on the economics and governance aspects, the fundamental elements of institution for managing water to achieve security and sustainability in an urbanizing world. It is intended to cover recent development in the focal aspects to demonstrates good practices, share experience and lessons, stimulate discussion and reflection, and thus eventually to promote paradigm shift and transformative change towards sustainable water management in urban areas. It is particularly interested in innovative approaches/tools/solutions available for supporting, operationalizing and delivering sustainable urban water management that is inclusive, resilient and adaptive. It expects to cut across the full spectrum of water development, use and conservation to glean management lessons, identify barriers for transformative change, and inform the global water agenda and initiatives for sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
