The Economics of Greenhouse Gases Emission Reduction

Message from the Guest Editor

Mitigating green gas emissions in order to avoid global warming beyond 1.5–2 °C has become even more pronounced and urgent given the hardships in the wake of the COVID-19 pandemic, specifically the dramatic impact on economic activities worldwide which, in turn, has both direct and indirect effects on greenhouse gas emissions and global warming. This raises timely questions, including what economic and climate policy package will be needed to deal with the economic consequences of COVID-19, and how will the current emergency affect, for example, the recently promulgated European Green Deal. Concrete—not merely declared and plans on paper—national actions on the part of all countries in the world, developed as well as developing economies, are called for, following the Paris accord. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
