

## Special Issue

# Ecosystem Services – From Conceptual Frameworks to Policy Implementation

### Message from the Guest Editors

This Special Issue aims to gather contributions addressing the link between science and policy in the operationalization of the ecosystem services concept. Possible topics to be addressed include the following:

- How can we integrate ES and biodiversity science in policy formulation processes? What models, indicators, and tools should we use?
- How can we use ES to support environmental planning and assessment processes?
- How can we navigate the ES concept in the water–ecosystems–food nexus?
- How can we scale up locally derived experience on policy instruments for ES and biodiversity conservation to national and transnational level policies?
- How can we integrate diverse sources of knowledge and multiple values to improve participation in ES assessment processes?

---

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
