

Special Issue

Ecotourism and Behavior Transformation

Message from the Guest Editors

While transformation can occur for both tourists and local residents/destinations, it seems that much research on tourism in general and ecotourism in particular has focused on the latter than on the former, although the sustainability of ecotourism largely depends on the existence of a population that cares about the environment/community and acts for the environment/community. This Special Issue invites manuscripts that focus on the following themes:

- Measurement development of self-transformation and ecotourism,
- Attitudinal and behavioral changes of an ecotourist and as a citizen,
- Role of ecotourism destinations/businesses in the promotion/facilitation of self-transformation,
- Impacts of self-transformation on the tourism industry, and
- Relationships between “green” citizens and “green” travellers.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
