

Special Issue

Efficiency, Fairness and Sustainability in Social Housing Policy and Projects

Message from the Guest Editors

Social housing is a complex topic that is interrelated with several fields of study—politics, ethics, economics, environment, architecture, and technology. In other words, social policy, at a national and local level, as well as public and private resources, and innovative tax and credit systems, are all necessary to promote social housing.

Social housing also implies social and urban transformations, and is, consequently, connected to urban planning, urban regeneration projects, real estate market dynamics, and cooperation between public and private stakeholders. In the most advanced proposals, social housing may also include environmental sustainability and technological innovation (energy savings, environmentally friendly materials, etc.), and be supported by evaluation of economic feasibility, multiple criteria decision model, and assessments on social and environmental sustainability.

This Special Issue of Sustainability offers a platform where all different topics may be presented to recompose the multi-faceted subject within a unified framework.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
