Special Issue

Energy-Efficient Computing Systems for Deep Learning

Message from the Guest Editors

Deep learning (DL) is receiving much attention these days due to the impressive performance achieved in a variety of application areas. Aimed at achieving everfaster processing of these DL workloads in an energy-efficient way, a myriad of specialized hardware architectures and accelerators are emerging.

The main objective of this Special Issue is to discuss and disseminate the current work in this area, showcasing new and novel DL algorithms, programming paradigms, software tools/libraries, and hardware architectures oriented at providing energy efficiency, in particular (but not limited to): Novel energy-efficient DL systems: heterogeneous multi/many-core systems, GPUs, and FPGAs: Novel energy-efficient DL hardware accelerators and associated software; Emerging semiconductor technologies with applications to energy-efficient DL hardware acceleration; Cloud and edge energy-efficient DL computing: hardware and software to accelerate training and inference; Inmemory computation and in-network computation for energy-efficient DL processing; Machine-learningbased techniques for managing energy efficiency of computing platforms.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
