

Special Issue

Energy Conservation and Management in Buildings: Technologies, Policies and Best Practices

Message from the Guest Editor

Buildings consume around 40% of the world's total energy and are responsible for emission of over a third of the global greenhouse gases. Improved performance of buildings through energy conservation and management is thus critical for sustainable development. Technical advancements coupled with conducive policies and regulations are helping buildings achieve higher standards of energy performance. This special issue aims to cover the broader facets of energy conservation and management in buildings with particular focus on technologies, policies and best practices. Papers can have diverse scope i.e. scientific advancement and technology innovation, policy development and implementation, industrial and commercial practices and case studies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
