Energy Efficiency Vision under Policy Perspective: New Societal Trends Influence Future Energy Demand

Message from the Guest Editors

Developmental trajectory might provide policy directions at the crossroads, which leads to a trade-off between social and economic objectives. To ensure a balance between the economic development and initiation of reassessment of dominant developmental policies, the United Nations introduced the Sustainable Development Goals (SDGs) in 2015. Succeeding the United Nations general assembly meeting in 2015, countries came to a consensus to accomplish the objectives of SDGs by 2030, with a view to establish sustainable development, i.e., economic, environmental, and social balances, and thereby uphold the spirit of intergenerational equity. The role of energy efficiency started becoming more prominent due to this, not only as an instrument to warrant energy security, but also an instrument to influence social inclusion. While innovation-driven energy efficiency is showing an upward trend, rural electrification is turning out to be a reality.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
