

Special Issue

Energy Efficiency and Urban Climate Adaption

Message from the Guest Editor

In most developing countries, government-led political regulation of the energy efficiency and urban climate adaptation could be much more effective at least in the short term in the initial stage, but without the strong support of the private sector, it cannot be sustainable. We have already seen many policy failures at this initial stage of ecological civilization. Therefore, this Special Issue wants to seek for a workable mechanism for sustainable governance. Therefore, the Special Issue shall focus on the issues of sustainable development and its governance under the Paris regime 2020. The subjects of this Special Issue shall be, but are not limited to, the following areas:

- Innovative case studies for sustainable eco-friendly implications and suggestions for energy efficiency;
- New methodological or conceptual approaches for sustainable governance as it relates to urban climate adaptation;
- Regional cooperation for sustainable development or green growth;
- Other related issues on sustainable development in the region.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
