Special Issue

Advanced Intelligent Technologies in Sustainable Energy Forecasting and Economical Applications

Message from the Guest Editors

Accurate sustainable energy forecasting is an essential issue to achieve higher efficiency and reliability in power system operation and security, energy pricing problems, efficient scheduling and planning of energy supply systems, etc. Potential topics include but are not limited to the following:

- Statistical forecasting models
- Artificial intelligent models
- Hybrid (combined) models
- Evolutionary algorithms
- Meta-heuristic algorithms
- Intelligent computing mechanisms (chaotic mapping; quantum computing; cloud mapping, seasonal mechanisms)
- Energy forecasting
- Renewable energy
- Planning, economics
- Robust optimization
- Stochastic programming

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
