

## Special Issue

# Energy Modeling Related to Sustainability

### Message from the Guest Editor

Access to high quality energy is a driver for economic and social development, yet the current structure of energy systems is causing severe environmental problems. As a result, a transition to sustainable energy and the attainment of goal 7 of the sustainable development goals (SDGs) is considered a prerequisite for reaching the other 16 SDGs. Considering the importance of the energy system in reaching the SDGs, it is the aim of this Special Issue to explore how energy modeling is used to support sustainable development, with a particular emphasis on the integrated modeling of energy systems. # About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
