

Special Issue

Energy Policy in Response to Global Climate Change

Message from the Guest Editors

Energy policy is one of the fundamental pillars of the sustainable development paradigm. Therefore, activities related to sustainable energy development are primarily focused on increasing the use of renewable energy sources in the energy mix, improving energy efficiency, and reducing greenhouse gas and air pollutant emissions. They less often address the issue of improving the quality of life of citizens and reducing the problem of energy poverty in society, even though society is the most important part of the system. Thus, the energy transition process, which involves the transition from conventional to sustainable energy, is a complex process that comprises environmental, economic, and social aspects in addition to purely energy-related factors. The main aim of this Special Issue, entitled Energy Policy in Response to Global Climate Change is to highlight the efforts of researchers from all over the world on energy policy relevant to environmental, economic, and social issues. We welcome original papers that provide new insights into these areas of interest.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
