

## Special Issue

# Energy Consumption Modeling of Innovative Technologies in Transportation Systems

### Message from the Guest Editor

The spread of new technologies (electric powertrains, autonomous driving, etc.) in private, public, and freight transport put the consolidated relationship between traffic and energy consumption/emissions at stake. In particular, the study of how intelligent transportation systems and technologies can contribute to alleviate energy consumptions and greenhouse gas emissions is of paramount importance. The identification of the main factors that can impact energy consumption is a key element to reduce road transport externalities on the environment and health. Among the topics of interest are: smart and sustainable mobility; smart and sustainable logistics; traffic and energy consumption analysis, simulation, and optimization; intelligent transportation systems, carbon footprint evaluation, and well-to-wheels analysis. For further reading, please visit the [Special Issue website](#).

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
