

# Special Issue

## Energy in Districts

### Message from the Guest Editor

The *Sustainability* journal will provide a Special Issue of energy in districts. The scope covers a variety of topics focusing on zero and positive energy districts, their definitions, solutions, and impacts, as well as planning and operation. Papers dealing with required services and business models of such districts are also welcome. Furthermore, papers may also cover the stakeholder and user roles of district-scale energy solutions. Papers may deal with either new constructions or renovations. If a paper addresses a strong focus on renewable energy solutions, it may also be considered, even if a zero or positive energy level is not reached in a district-level.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
