

## Special Issue

# Energy Sustainability and Tourism

### Message from the Guest Editor

This Special Issue focuses on the hospitality industry as an important part of the tourism sector that impacts various national segments, such as economic activity, employment, entrepreneurship, etc. Among other resources, the hospitality industry uses substantial amounts of energy to provide comfort and services to its guests, typically with an alarmingly low level of energy efficiency. The effects on the environment include emissions to and pollution of water resources, soil and air, noise, as well as the excessive use of natural or cultural resources. The purpose of this Special Issue is to build on, challenge, and criticize perspectives and pressing issues concerning sustainable energy and tourism. The hospitality industry has a considerable opportunity to lower their carbon footprint and make a positive impact towards the green movement. While this overview presents a summary of the Special Issue, we are open to your proposals that relate to or challenge understandings of sustainable energy management in tourism.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
