Engineering Education for Sustainable Development

Message from the Guest Editors

Sustainability was initially referred to environmental concerns and is now accepted as a term compassing social, ethical and economic issues (Dow Jones Sustainability Indices, 2018). Facing multiple challenges in the global competitive market, including market competition and changing needs of sustainability, more and more organizations have started to align their self-interest with the public good in ways that add value to both the firms and society. Organizations are becoming more willing to include sustainability in their management strategies.

However, COVID 19 and similar epidemic make a serious impact on the global environment, in various aspects. COVID 19 crisis is getting worse in some countries with each day and governments are finding it difficult to minimize the unprecedented impacts on human lives, business and on the economy...
