

Special Issue

Engineering and Decision Support for Sustainable Development

Message from the Guest Editors

On a planet that is constantly changing, and in a society that is constantly evolving, applied engineering should be reshaped to consider modern global needs. Thus, in an extremely dynamic period for humanity, with evolution moving at a very fast pace, engineering science is required to adapt to global conditions. The “Engineering and Decision Support for Sustainable Development” Special Issue calls for high-quality research papers that promote multi-disciplinary tools and techniques to robustly support decision making and solve practical problems towards sustainable development. The issue covers an interdisciplinary area related to the sustainability characterization literature, since it delves into all aspects of the three pillars of sustainability: economy, society and environment. On this basis, the issue will usefully supplement currently available related literature.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
