

## Special Issue

# Engineering Properties and Environmental Effect of Recycled Waste in Geotechnical Engineering

### Message from the Guest Editor

This Special Issue focuses on the generation and characterisation of engineering properties, assessing the environmental impact of agro-industrial wastes and by-products and explores their potential applications as promising eco-friendly, cost-effective construction materials. Original research articles and reviews addressing the environmental impact of agro-industrial waste disposal, characterising engineering properties of recycled wastes and their applications in geotechnical engineering are welcome. Research areas may include (but are not limited to) the following:

- Assessing the environmental impact of waste disposal
- Soil stabilisation by recycled wastes
- Numerical modelling and machine learning of waste contamination
- Experimental investigations of utilising recycled wastes in geotechnical engineering
- Solid waste management techniques
- Recycling wastes in pavement base and subbase
- Recycled construction and building materials
- Alternative additives/green chemical stabilisers for ground improvement
- Sustainable development of civil infrastructures
- Engineering applications of recycled waste for a cleaner environment and production

---

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
