

Special Issue

Environmental Impact Assessment and the Culture of Sustainability

Message from the Guest Editors

The purpose of this Special Issue is to set a discussion on how to make explicit and expand this cultural side of EIA. Both conceptual and case-based papers are welcome. Examples of contents include but are not limited to:

- Cultural lessons we may learn from the EIA procedure;
- Case studies on the ethical dimensions of EIA;
- Cultural traditions that may provide inspiration to enhance the EIA procedure;
- Cultural views on EIA practices.

This Special Issue will contribute to an integrated understanding of the importance EIA has in current societies. Complementing technical knowledge with a humanistic perspective is key for researchers and practitioners to understand and perform EIA in a holistic way that maximizes the full potential of this procedure as a tool for sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
