

## Special Issue

# Environmental Energy Harvesting and Storage

### Message from the Guest Editors

This Special Issue focused on “Environmental Energy Harvesting and Storage” will present a broad range of topics covering the fabrication, characterization, and applications of energy storage and harvesting devices. These devices include but are not limited to metal-ion batteries, solid-state batteries, supercapacitors, metal-ion capacitors, nanogenerators, thermoelectrics, photovoltaics, solar steam generators, etc. The goal is to combine energy storage and environmental energy harvesting to showcase the latest innovations and developments related to the above topics, and to use sustainable materials to open up markets and future opportunities in energy harvesting and storage fields.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
