

## Special Issue

# Global Environmental Health and Safety

### Message from the Guest Editor

This Special Issue will comprise papers covering a variety of health, environmental, and safety concerns both in the US and internationally, such as infectious disease pandemics, environmental health risks, vaccination development and delivery, crisis and emergency management, air pollution and allergic diseases, food safety and nutrition, environmental justice, crime and injury prevention, traffic accident and safety, and so on. A special emphasis is given to innovative methodological and technological contributions to estimating disease burden from environmental risk factors, measuring the relationships among medicine, science, the natural and human-made environment, geography, culture, socioeconomic factors, policies and health, and developing strategies for addressing outstanding global health, safety and sustainability issues. Papers selected for this issue may also discuss how national and regional public health and environmental authorities around the world have coped with uncertainty during the rapid spread of the ongoing COVID-19 epidemic.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
