

Special Issue

Environmental Economics. Contributions to Sustainability of Agricultural Ecosystems

Message from the Guest Editors

This Special Issue of *Sustainability* is open to studies covering the wide range of topics related to environmental economics and sustainable management of agricultural ecosystems including, but not limited to evaluations of investment projects, analysis of sustainable management, socio-economic valuation of ecosystem services, economic circularity, land use, and conservation. Contributions focused on the achievement of sustainable development under an economic point of view are welcome as well as works related to legal measures or analyses with a social perspective. Documents dealing with measures to mitigate environmental impacts through sustainable management practices, development of circularity processes on value chains, assessment of proposed or already implemented legal measures are especially welcome. In addition, we are interested in the methodologic development of economics to face the challenge of sustainable management in agricultural ecosystems.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits
