Sustainability on Environmental Health and Well-Being

Message from the Guest Editor

Creating a sustainable healthcare system presents many seemingly intractable problems. In developed countries, aging populations and increasingly unhealthy lifestyles are linked to ever higher expectations that healthcare will preserve good health indefinitely. Costs of medical equipment and drugs increase to such an extent that they are now given their own inflation rate. As healthcare struggles to keep up with demand, staff and budgets are equally exhausted. Energy use increases, as does the production of waste, both hazardous and plastic. The concentration of drugs in wastewater creates serious threats to aquatic biodiversity, and potentially to human health. Tackling these and other threats requires a fundamental re-think of how healthcare operates. About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
