

Special Issue

Environmental Behavior of Nanoparticles

Message from the Guest Editors

This Special Issue aims to focus on recent advances in research on environmental behaviors of natural and engineered nanoparticles. This mainly includes the adsorption, desorption, and interaction between natural and engineered nanoparticles and contaminants. High-quality original research papers on these topics will be welcomed, which may reflect both technical advances and innovations with respect to the environmental behaviors of nanoparticles, including eco-toxicology of nanoparticle–contaminant complexes and nanoparticles. The investigation of interactions between natural nanoparticles (e.g., dissolved organic matter, humic substance, super-biomolecule) and contaminants is also encouraged, especially in aquatic systems. Review articles which describe the current state of research on the environmental behaviors of nanoparticles and risk assessments of nanoparticles are also welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
