

## Special Issue

# Green and Sustainable Solutions for the Environment

### Message from the Guest Editor

Traditionally, solutions for environmental problems have been developed based on the goal of being in compliance with regulatory standards for selected environmental pollutants. However, the current pressure to improve the sustainability of our society necessitates a more holistic approach in developing such solutions. This Special Issue deals with innovation in environmental science and engineering, which addresses beyond the traditional goal of meeting the regulatory limit, such as the development of greener and/or more sustainable environmental solutions, and evaluation of the sustainability of existing and/or novel environmental solutions. This Special Issue welcomes manuscripts presenting efforts to develop environmental solutions that use greener energy/resources, convert wastes into greener products, and are designed to improve the environmental/economic sustainability of the currently-implemented processes. Manuscripts discussing the life-cycle of environmental impacts and/or life-cycle costs of the currently-implemented and/or novel processes for environmental solutions are also welcomed.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
