Environmental and Sustainability Education in Early Years: Global Contexts, Understandings and Perspectives

Message from the Guest Editors

Sustainability is yet to find a universally accepted definition and continues to be a highly contested topic based on individuals' environmental identity, understandings of equity, justice, and freedom. Individuals' environmental beliefs are deeply held and influenced by their early life experiences, values, and knowledge. We extend this contestation to include sustainability within this paradigm—an equally complex and fluid term with many versions and not any single agreed-upon definition. There is therefore a need for varied lenses in helping to understand sustainability through different worldviews, thereby creating a better understanding of this term (Corcoran, Walker and Wals, 2004). This will also allow for deeper perceptions into sustainability as it is understood across the globe, and also the many dimensions of sustainability such as space, time, history, ethics, and culture. Sustainability, understood differently across different countries and cultures, is developed over time and based on a wide range of norms and values.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
