Special Issue

Sustainability Assessment of Environmental Technologies

Message from the Guest Editor

There is an urgent need to develop and use environmental technologies that can contribute towards a more sustainable society. As technological, environmental and economic assessments use different perspectives, they are often done independently using separate models, with different assumptions at different technology readiness levels (TRL). To facilitate the development of technology towards all three dimensions, integration is needed, taking into account the interlinkages and possibly the correlations between the different dimensions. Sustainability assessment brings economic, social and environmental information together. The combination of different metrics combining environmental and economic aspects is an interesting approach to assess sustainability performance. Techno-economic assessment (TEA), life cycle costing (LCC), life cycle analysis (LCA) and costbenefit analysis (CBA), including the valuation of externalities, are important methodological components towards sustainability assessments.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
