Special Issue

Environmental Water, Air, and Soil Pollution

Message from the Guest Editors

Climate change is one of the most important challenges facing the humanity, especially water and food security which is affecting almost all continents of the world. Industrialization and population growth in 21st century are considered to be the primary reasons for climate change resulting in huge impacts on soil, water, air, and food systems. In order to achieve UN's Sustainable Development Goals for 2030 and make the world a better place global populations to thrive and revive the damaged ecological systems, we need to be innovative in developing technologies and practices for making sure that soil, air, and water pollution challenges are mitigated at a rapid pace in response to climate change.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
