## **Special Issue**

# Environmentally Sustainable Third Party Logistics

#### Message from the Guest Editors

This special issue on environmentally sustainable thirdparty logistics is timely. It will showcase the work of leading researchers from a variety of geographical settings, as well as from supply chains than span a range of different industrial sectors and products. It has a particular focus on methodological innovation. This is critical if fresh insights are to be developed into our understanding of the myriad complex phenomena that contribute to the design, planning and execution of truly sustainable third-party logistics operations. Papers adopting combined qualitative and quantitative methodologies, as well as more conceptual and theoretical papers, are particularly welcome. Papers selected for this Special Issue will be subject to rigorous peer review with the aim of wide dissemination of new insights in a timely manner. Ultimately, this will contribute to policy development at national, regional and international levels, as well as to strategy formulation at supply chain and firm levels. It will also contribute to the debate amongst scholars as we seek to further develop a deeper understanding of the factors under investigation.

## **About the Journal**

#### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

#### Editor-in-Chief

#### Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario Institute of Technology, Oshawa, ON L1G OC5, Canada

#### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### **Journal Rank:**

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
