

## Special Issue

# Evaluating SDGs—Measuring and Managing Projects, Programs and Policies

### Message from the Guest Editors

In 2015, the General Assembly of the United Nations endorsed Agenda 2030, including globally valid Sustainable Development Goals. Monitoring and evaluation are explicitly mentioned as key success factors for achieving the SDGs. However, these efforts have to deal with a high level of complexity, potential trade-offs, interconnectedness and systemic effects, as well as different perspectives and interests of various actors. While the present discussions mainly focus on indicators, evaluation is only rarely addressed—although some debates are taking place in different, but only loosely linked, scientific communities. Bringing together these different discussions is the goal of this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
