Special Issue

Evolutionary Perspectives on Human Behavior in Pandemics

Message from the Guest Editor

Understanding human nature is one of the central goals of behavioral and cognitive sciences, as well as philosophy, anthropology, sociology and linguistics. Evolutionary psychology provides its own vision of human nature as a universal set of evolved psychological adaptations to solving problems in the ancestral environment. It is of special interest how such emotional and cognitive adaptations enable humans to cope with current ecological and social problems. The goal of this issue is to provide an evolutionary sound understanding of human behavior in situations of pandemics, particularly during COVID-19.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
