

## Special Issue

# A Decision Support System for a Circular Economy Transition in a Small Historical Town (Borgo)

### Message from the Guest Editors

This Special Issue (SI) explores the crucial role of Historical Small Towns (HSTs) in the transition to Circular Economy (CE) paradigm. Italian HSTs offer ideal settings for CE implementation due to their size and characteristics. The aim is to address the gap between existing CE models and practical application by developing an integrated framework for HSTs, focusing on waste/energy optimization and leveraging local features. It welcomes contributions on CE/Urban Metabolism and Symbiosis focusing on current methods, tools, best practices, and circularity metrics, case studies analyzing waste flows, energy generation potential, cost-benefit analyses, optimal interventions and models for CE implementation.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
