Sustainability of Wine Production and Food Systems in the Mediterranean Region

Message from the Guest Editors

The Sustainable Development Goals (SDGs) of the 2030 Agenda for Sustainable Development aim to complement policy with scientific knowledge and orient government strategies toward a new development paradigm.

Food sustainability for humans involves the ability, sustained over time, to produce or procure enough food to meet an individual's or a population's nutritional requirements, using production, distribution, and disposal systems that have a neutral or beneficial impact on the environment and ecosystems, and that ideally are underpinned by forms of social justice that can ensure equitable access to food. Hence, we need novel solutions for our future food security and sustainability without compromising food safety to achieve the SDGs including the eradication of hunger and poverty, clean water, sustainable land use, etc. Ensuring food security in an environmentally sustainable way is a global challenge and is urgent to develop and adopt nature-based solutions to increase agriculture productivity in an environmentally. Together with sustainable food systems, sustainable diets help articulate more concretely and operationally food security and sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
