

Special Issue

Eco-Environmental Effects and Spatio-Temporal Evolution Characteristics of Land Use Change

Message from the Guest Editor

Understanding land use changes is crucial for environmental management, sustainable development, and policy making. It involves monitoring, mapping, and assessing the impacts of these changes on ecosystems, biodiversity, natural resources, and human societies.

The purpose of this Special Issue is to publish the latest advances in monitoring, mapping, and assessing land use changes and their consequences on ecosystems, biodiversity, natural resources, and human societies. We particularly encourage studies that leverage innovative approaches, including remote sensing, GIS, machine learning techniques, and diverse eco-environmental models. The topics of the Special Issue include, but are not limited to:

- Urbanization and Urban expansion
- Agricultural Land Use
- Forest Cover Change
- Protected Areas and Conservation
- Land Use and Climate Change
- Rural–Urban Interface
- Land Use Policy and Governance
- Land Use and Ecosystem Services
- Land Use and Water Resources
- Land Use and Food Security
- Remote Sensing and GIS Applications
- Social and Economic Dimensions
- Land Use Change and Biodiversity Loss

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
